

INTERIM VP AND COO TOURS OAS

1. The company is a public company (C), and the company is a public company (C), and the company is a public company (C).

USF PARKING GOES VIRTUAL

2021-2022

USF Parking has implemented a virtual parking system for the 2021-2022 academic year. This system allows students and faculty to manage their parking permits online, providing a more convenient and efficient process. The virtual system includes features such as online permit renewal, payment processing, and the ability to report lost permits. This initiative is part of USF's commitment to digital transformation and improving the user experience for its community members.

The virtual parking system is accessible through the USF Parking website and mobile app. Users can create an account, upload their photos, and manage their permits from anywhere. This system also provides real-time updates on permit status and parking regulations.

2021-2022

USF RECOGNIZED FOR TEN YEARS OF SUSTAINABLE CAMPUS FORESTRY
