

FAMIS Analytics Space Survey Report Instructions

These instructions are being provided to assist Space Surveyors and Approvers in accessing the FAMIS Analytics Space Survey reports. These status reports are used to review the data that has been entered for USF's Annual Space Survey. This includes instructions on how to use FAMIS's Analytics reporter to generate the two separate reports for space survey data. Users will need to use both reports to review their data. Additionally, instructions have been provided to assist with filtering the data within FAMIS Analytics, and once the reports are generated, filtering within the Microsoft Excel format.

There are 2 reports for Space Survey:

- Space Survey Status Report
- Space Survey Occupancy Status Report

The reports will show the data and progress that has been completed by the Surveyor and Approver. (Only data that has been approved will be in the reports. Surveyor should coordinate with their Approver(s) to review and approve the records prior to generating the reports).

Space Survey Status Report

Step 1 - Log into FAMIS through MyUSF > Business Systems > Facilities Work Order (FAMIS)

Or use (<https://usf.edu/famis>)

Step 2 - After you are in FAMIS, click on the small icon located to the right in the green banner.
