

Ph.D. Program Overview

The Ph.D. program in Communication Sciences & Disorders combines an exciting and versatile academic curriculum and a variety of rich research opportunities. CSD is home to the USF Hearing Clinic, Speech-Language Clinic, and Bolesta Center. Ph.D. students benefit from discipline specific as well as multi-disciplinary programs of study tailored to the areas of interest and strength of each individual student.

Areas of Emphasis

The program emphasizes critical thinking, knowledge acquisition, and skill development to prepare research scientists of tomorrow capable of addressing theoretical and applied issues in laboratory, clinical, and classroom settings. Coursework emphasizes basic and advanced study in the communicative sciences and related disciplines while extensive research experience focuses on the development of a personal programmatic line of research required for success in a research/academic career.
