

Creating an Assignment

TurnItIn allows faculty to check their students writing assignments against a database of academic work to see if their students' submissions are plagiarizing. This guide will cover how to create a TurnItIn assignment in Canvas LMS.

1 Access your Canvas course and click on **Assignments** in your Course Navigation.

2 Next, click on **Assignment** in the upper right-hand corner of your screen.

3 Under submission type select **Online Text Entry** and check **Require File Uploads**.
