The meeting was called to order at 3:06pm

1. The minutes of November 9<sup>th</sup>, 2009 were approved.
2. Announcements

Guest speaker Roger Brindley, Associate Director of USF World spoke to the council on a proposal for a partnership between USF and INTO University Partnerships. Documents detailing the flow of students through the new program were distributed, along with example class schedules for incoming students. INTO and USF are currently in talk to form a "Joint Venture" (JV). The purpose of the JV is threefold, 1) to increase international enrollment at USF, 2) to increase the graduation rate of international students, and 3) to increase the global reach of the university. USF is greatly in need of increased international student enrollment, as currently only 3-3.5% of undergraduate students are foreign residents. While INTO is a business, it is hoped that USF will profit from the JV after a few years. The JV will establish undergraduate "Pathway" programs that most international students will follow. Students with poor GPA's and low TOEFL scores will be granted provisional admission and referred to the English Language Institute. Once students enter the pathway program, they will need to maintain a 2.5 GPA in order to progress. Special INTO sections of some courses will be taught by USF employees. INTO will also provide 24/7 telephone and additional tutoring support. The pathway program will begin with only a few programs, but will expand to more programs. Roger Brindley will come back to speak to the council in February or March with updates.
